Natural Language Processing

anoopsarkar.github.io/nlp-class

Programming Languages
C, C++, Java, Python, …

- unambiguous
- fixed
- designed
- learnable?
- known simple semantics

Natural Languages
French, English, Korean, Chinese, Tagalog, …

- ambiguous
- evolving
- transmitted
- learnable
- complex semantics

Why is NLP computationally hard?

$ 20 happy meal

$ CD JJ NN   a noun phrase type
10 noun phrase types

100 noun phrase types

Language
is complex

1000 noun phrase types

6K noun phrase types

Language is ambiguous

- Lung cancer in women mushrooms
  - Mushrooms is noun or a verb?
- Ban on nude dancing on governor's desk
  - Similar to "if-then-else" ambiguity
- Island Monks Fly in Satellite to Watch Pope Funeral
  - "fly in" vs. "fly [$_{OBJ}$ in Satellite]" hidden segmentation
- British Left Waffles on Falkland Islands
  - Is it British/Noun Left/Verb or British Left/NP Waffles/Verb?

Language is Parsed

- Google's Computer Might Betters Translation Tool

  – New York Times March 8, 2010

- Number of Lothian patients made ill by drinking rockets

  – Edinburgh Evening News, March 4, 2010

- Violinist linked to JAL crash blossoms

  – *http://languagelog.ldc.upenn.edu/nll/?p=1693*
Different levels of language

- Phonetics: acoustic and perceptual elements
- Phonology: basic sounds (phonemes) and rules for combination
  - e.g. vowel harmony. Anupu is pronunciation of Anoop in Classic Period Mayan
- Morphology: how morphemes combine to form words, relationship of phonemes to meaning
  - e.g. delight-ed vs. de-light-ed

Different levels of language

- **Syntax: sentence formation**
  - e.g. The clown who the musician hits watches the ballerina
- **Semantics: meaning (from syntax to logical formulas)**
  - e.g. Everyone is not here => what does this mean? Nobody / Not everyone is here.
- **Pragmatics: meaning that is not part of compositional meaning,**
  - e.g. This professor dresses even worse than Anoop!

Imagine an "**Imitation Game**," in which a man and a woman go into separate rooms and guests try to tell them apart by writing a series of questions and reading the typewritten answers sent back. In this game both the man and the woman aim to convince the guests that they are the other.

Alan Turing

We now ask the question, "**What will happen when a machine takes the part of A in this game?**" Will the interrogator decide wrongly as often when the game is played like this as he does when the game is played between a man and a woman? These questions replace our original, "**Can machines think?**"

Winograd Schema

The town councillors refused to give the angry demonstrators a permit because they feared violence.

Who feared violence? ⟹ Answer 0: the town councillors

Answer 1: the angry demonstrators

_____

The town councillors refused to give the angry demonstrators a permit because they advocated violence.

Who advocated violence? Answer 0: the town councillors

⟹ Answer 1: the angry demonstrators

# Some examples of NLP tasks

Information Extraction

Así lo explicó hoy el presidente del [ORG Gobierno] español, [PER José María Aznar], en la conferencia de prensa con la que

concluyó la [MISC XIII Cumbre Hispano-francesa], celebrada en [LOC Santander], con asistencia del presidente francés,

[PER Jacques Chirac] ; del primer ministro, [PER Lionel Jospin], y trece miembros de ambos gabinetes.

Information Extraction

Association of N-glycosylation of apolipoprotein B-100 with plasma cholesterol levels in Watanabe heritable hyperlipidemic rabbits.

Terry Pratchett lives in England.

LocalizationID `022`   PSID `10126`

1) Select "valid" if the passage contains strong evidence of an experimentally determined localization.

PubMed Entrez   PMID `9811664`

PubMed Centreal   PMCID `107680`

The cytoplasmic membrane proteins ExbB and ExbD support TonB-dependent active transport of iron siderophores and vitamin B12 across the essentially unenergized outer membrane of Escherichia coli.

Valid ☐   Invalid ☐   Maybe ☐   Reviewer [▼]

Comments

[   ]

2) If the passage is valid then select whether the protein, organism, and location names are also valid. (If you want to defer your decision then select neither valid nor invalid)

Protein: [ExbB   ]
☐ Valid   Invalid ☐

Organism: [Escherichia coli   ]
☐ Valid   Invalid ☐

Location: [cytoplasmic membrane   ]
☐ Valid   Invalid ☐

SQuASH: SFU QA Summarization System

Input: 25 news articles, Complex question   **Output:** 250-word summary

Q. Describe developments in the movement for the independence of Quebec from Canada.

A. Canadian Prime Minister Jean Chretien has ruled out the possibility that the French-speaking province of Quebec could declare independence even if a majority of Quebeckers vote for secession in the next referendum. Premier Lucien Bouchard and the separatist Parti Quebecois have retained control of Canada's largest province, possibly setting the stage for a bitter confrontation with the rest of Canada, and possibly another referendum on independence. Canada's Supreme Court managed to rule on the question of Quebec secession without infuriating leaders on either side of a bitter ideological divide. ...

Headline Generation

Headline A: US launches air raids in Somalia

Headline B: Somalia says dozens killed in US attack

Headline C: Many dead after US strike in Somalia

Headline D: US Launches New Attacks in Somalia

Headline E: US strikes terrorist targets in Somalia

Visualization of Information

Identifying confusable drug names

G. Kondrak and B. Dorr

Table 4 Top 8 names that are most similar to *Toradol* according to the BI-SIM similarity measure, and the corresponding recall values
	Name	Score	+/−	Recall
1.	*Tramadol*	0.6875	+	0.25
2.	*Tobradex*	0.6250	−	0.25
3.	*Torecan*	0.5714	+	0.50
4.	*Stadol*	0.5714	−	0.50
5.	*Torsemide*	0.5000	−	0.50
6.	*Theraflu*	0.5000	−	0.50
7.	*Tegretol*	0.5000	+	0.75
8.	*Taxol*	0.5000	−	0.75

Holy Grail: Understanding Language

- Can we *generate* language from our knowledge of language?
- Can we convert a natural language utterance into a *model* (or some other fancy logic thing)
- Can we map it into a *database*?
- Can we map it into a *mental picture* (or a *real* one?)
- Demo: WordsEye (from Richard Sproat's group at AT&T)

Text to semantic model to image

The vase is on the Richard Sproat coffee table. The table is in front of the brick wall. The Van Gogh picture is on the wall. The Matisse sofa is next to the table. Mary is sitting on the sofa. She is playing the violin. She is wearing a straw hat.
